To You Interested in West Virginia Agriculture

Economic readjustments have created new problems for our way of life. Changes are mandatory—as a state and nation we cannot continue to live beyond our means. Agriculture, as well as industry, is undergoing great changes. The great dilemma in American agriculture is and has been, for the past fifty plus years, what to do with our abundant production. When supply exceeds demand, prices go down and producers are in difficulty. If production is down, prices go up and consumers become upset. Striking a happy medium has been the attempt of government, but uncontrollable factors such as weather complicate the situation.

We've seen cuts in funding for government programs, extremes in weather conditions and changes in export demand and policy, all of which make the farmers' decisions more difficult. Support and assistance to the West Virginia agricultural industry is my commitment. Providing up-to-date statistics is one of the best methods of assistance, which is one of the reasons I wholeheartedly support the publication of "West Virginia Agricultural Statistics."

Through the cooperative effort of the West Virginia Department of Agriculture and the U.S. Department of Agriculture, this statistical publication is compiled. I wish to express my appreciation to West Virginia farmers, agribusiness people and all others who helped to make this bulletin possible.

I am

Very truly yours,

Gus R. Douglass
Agriculture Commissioner

To our Friends and Subscribers

This is the second of a two-year series in which we present the historical data for West Virginia agriculture. In this volume, we present the data on livestock as far back as 1867 for the major species; i.e. cattle, milk cows, hogs, sheep and chickens. We felt that these data should be easily available in published form, yet having crops and livestock in one volume would be too voluminous; therefore, we published crops in the first of the series (No. 13) and livestock in the second (No. 14).

It is our hope that this will satisfy the need of our data users more readily than before. This also helps to reduce the cost of acquiring these data since we now have to charge for our publications. The cost of these bulletins is $5; however, to those who provide information to make this publication possible, there is no charge.

I want to express my appreciation to those who made this publication possible: the office staff—Glen Smith, ASIC; Michael House, Veronica Jenkins and Greg Stamm, Statisticians; Kathy Neas, Computer Programmer; Ramona Lewis, Support Supervisor; Geraldine Kent and Kathleen Krise, Statistical Clerks; Joe Ann Bowman, Mail Room Clerk; and Carol Mace—who is responsible for putting this publication in print: To the corps of NASDA enumerators who are responsible for the collection of much of our current data: To the County Tax Assessors and their deputies, who provided agricultural reports for their counties: and last but not least, to all of our reporters.

FRUIT PRODUCTION 1982

GENERAL: APPLE AND PEACH PRODUCTION FOR THE CROP YEAR OF 1982 TOTALED 254 MILLION POUNDS, 17 PERCENT BETTER THAN THE PREVIOUS YEAR AND 2 PERCENT ABOVE THE PREVIOUS 10 YEAR AVERAGE OF 248 MILLION POUNDS. APPLES WERE RATED IN FAIR TO GOOD CONDITION THROUGHOUT THE GROWING SEASON, BUT PEACHES WERE CONSISTENTLY RATED POOR.

OF THE 240 MILLION POUNDS PRODUCED, 36 PERCENT OR 87.2 MILLION POUNDS WENT TO FRESH SALES, DOWN 10 MILLION POUNDS FROM THE PREVIOUS YEAR. THE REMAINING 152.8 MILLION POUNDS WERE UTILIZED FOR PROCESSING WITH 94.7 MILLION POUNDS CANNED, 16.4 MILLION POUNDS FROZEN, 41.2 MILLION POUNDS FOR JUICE AND CIDER, AND .5 MILLION POUNDS FOR OTHER USES.

THE VALUE PER POUND, REACTING TO AN INCREASED CROP, DECREASED 19 PERCENT FROM 1981 TO 9.4 CENTS PER POUND. VALUE OF PRODUCTION DECREASED 1 PERCENT FROM 1981 TO $22,597,000 IN 1982.
